Hiring Manager

Dear Hiring Manager,

I am writing to express my strong interest in any open **Business Intelligence Developer** or **Data Analyst** position within your esteemed organization. As a recent graduate of Computer Science from MTI University and a certified Power BI Data Analyst, I bring a strong foundation in data analytics, business intelligence, and data-driven decision-making.

During my academic journey and internship experience, I developed solid analytical and technical skills in SQL, Python, Power BI, and Excel. I have completed several practical projects where I built interactive dashboards and reports that revealed actionable insights in domains such as e-commerce, CRM, HR, and supply chain. I also completed hands-on training using tools like SSIS, SSAS, and SSRS, showcasing my ability to work across the BI lifecycle from ETL to reporting.

My experience as a Data Analyst Intern at Agouza Rehabilitation & Rheumatology Center helped me work with real-world healthcare data to improve service quality through meaningful insights. I am passionate about turning complex data into clear and impactful visuals that support business strategies.

I am eager to contribute to your team's success and grow within a challenging and innovative environment. I am confident that my technical capabilities, continuous learning attitude, and problem-solving mindset would make me a valuable addition to your data team.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can add value to your organization. Please feel free to reach out via email or phone at your convenience.

Sincerely,

Ahmed Abdelmonem Abdelhalim
